

# **MOSQUITO FIRE PROTECTION DISTRICT DISTRICT STATUS REPORT**

**Fire Chief Eddie Dwyer**

**June 8, 2017**

## **I. The Department**

We have achieved our final hurdle for ALS Service here in the community. MFPD is now recognized as an Engine based Paramedic Provider. We should have all equipment next week and should be able to be operational on a limited basis starting next week.

Six of our Personnel Graduated from Two Different Fire Academy's  
George Town Graduates.

Ian Bence

Sarah Buchannan Honors Class Spokes person

Tony Cobb

Andrew Douglas Honors Top Student

Dave Stetler,

From Sierra Fire Academy

Philip Southern

## **II. The Station**

Nothing to report

## **III. INFORMATION:**

**Due to safety concerns Captain Purves shut down the MVFA meeting, the evening of June 1, 2017**

On May 23, 2017, during the County Board of Supervisors meeting the Mosquito Fire Protection District and its Members received recognition from the El Dorado County Emergency Services Authority for actions taken during the Storm Emergencies of January, February, and March of this year. In that same meeting five of our personnel received recognition for actions taken on a medical aid. The patient who was experiencing a significant cardiac emergency received expert care and field treatment. The patient was transported by helicopter to a hospital in Roseville, where he underwent reperfusion therapy.

The District Members who were recognized are:

Captain Ryan Purves,

Firefighter Phil Southern

Firefighter Andrew Gregory

Firefighter Dave Stetler

Firefighter Sheralee Ries

We have submitted a proposal for the Halftime Paramedic Ambulance. Garden Valley and Diamond Springs have also submitted proposals. Though our proposal was in the middle, neither of the other agencies included overtime budgets. This could make it more advantageous to choose MFPD. It will now go to a subcommittee for recommendation. The process will include review and recommendation.

I spoke to a representative from FEMA about our Aid to Fire Grant. Things are moving a little faster at this point. We should be hearing soon.

#### **IV. Equipment:**

**Engine 75** is in good shape.

**E275** Good Condition, AC needs servicing.

**T75** is in good shape.

**Command 75** no change

**Utility 75** Is in service and in relative good shape for its age

#### **V. Calls for Service**

8 medicals

3 Fire/Illegal Debris Fires

2 smoke checks

3 public assists

1 traffic Collision
